## *Advanced Training Workshop*

# Regeneration & Microsurgery

June 1 – 2, 2015

The **Advanced Training Workshop on microsurgery and Periodontal Regeneration** is an interactive course, powered by focused hands-on training and video demonstrations. It aims at clinicians wishing to upgrade their skills in the

application of periodontal regenerative surgery with the aid of a surgical microscope. The course consists of an integrated approach designed to build and extend the skills of the practicing periodontist in the area of contemporary periodontal regenerative surgery, microsurgery and minimally invasive surgery. The material will be covered with lectures, practical exercises on simulators, case discussions and treatment planning exercises.

This intensive 2 days course focuses on 3 main objectives:

1. the acquisition of state of the art knowledge and competence
2. the acquisition of the practical skills and
3. the ability to apply them on the solution of practical cases.

Day 1

9:00-13:00 - lunch - 14:30-18:30

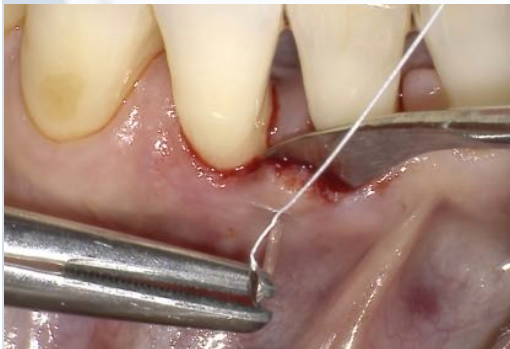

# Regeneration & Microsurgery

Monday, June 1

## Acquisition of the Practical Skills *Hands-on surgical exercises on anatomical simulators*

1. Periodontal regeneration of intrabony defects. 2. Critical evaluation of periodontal regenerative materials 3. Surgical instruments and materials 4. Tissue handling and suturing techniques 5. Papilla preservation flaps 6. Microsurgery 7. Minimally invasive surgery 8. Hands on in depth tutorial on surgical methods: incisions and suturing techniques

*Exercises will be performed on specifically designed silicone and animal models with step by step supervision by the speakers. All instruments and materials will be provided, including a training surgical microscope.*

**Venue:** SWEDEN & MARTINA S.p.A. Via Veneto, 1035020 Due Carrare (PD) tel. +39.049.9124391 fax +39.049.9124203

Day 2

9:00-13:00 - lunch - 14:30-18:30

# Regeneration & Microsurgery

Tuesday, June 2

## Acquisition of the Practical Skills

*Hands-on surgical  
exercises on  
anatomical simulators*

1. Hands on in depth tutorial on surgical methods a. Modified papilla preservation flaps b. Simplified papilla preservation flaps c. Minimally invasive surgical techniques d. Single and multilayer internal mattress sutures e. Application of regenerative materials. 2. Discussion and conclusion of the course.

*Exercises will be performed on specifically designed silicone and animal models with step by step supervision by the speakers. All instruments and materials will be provided, including a training surgical microscope.*
